# Introduction

*spAce Architectural Interiors is proud to bring you our 2023/2024 LX Hausys 'Collection'*  
*Our carefully selected designs include an all encompassing offering perfect for any interior or sector...*

*Pure  
solid  
colours*

*Seductive  
metallics*

*Stunning  
stones and  
marbles*

*Urban  
textured  
concretes*

*Luxurious  
leathers  
and linens*

*Tactile  
timbers*

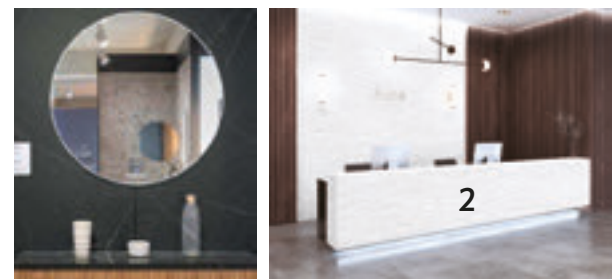

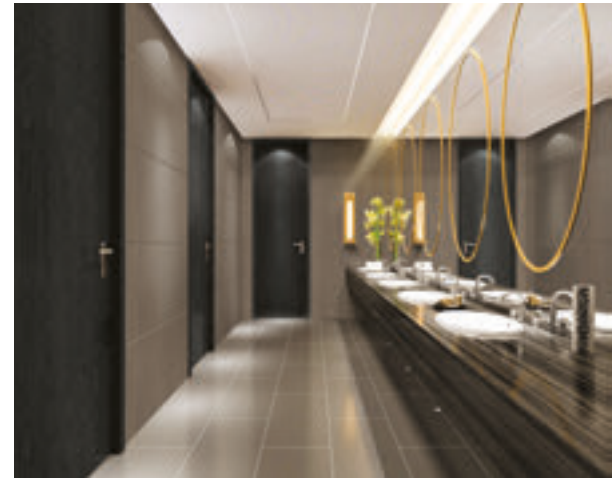

## ***Why use interior film...?***

*Interior film creates endless design opportunities perfect for any interior.  
It will save an average of 80% on your refurbishment cost and even more on your  
socially responsible conscience!*

*Wrapping existing fittings is a far more environmentally friendly option, hugely reducing landfill  
and Life Cycle Assessment... did you know, it only takes 20 doors to fill a skip?!*

*As of July 2023 spAce Architectural Interiors (and APS) achieved Carbon Neutrality for  
scope 1,2 & 3, so your supply chain is also green helping you to achieve the PAS 2060 targets!*

*It's quick, mess free, and you can use the space as soon as it's complete,  
heavily reducing down time and lost revenue.*

# Key Information

## Product Info

All films are suitable for application onto smooth, flat and curved surfaces, and are perfect for wrapping edges and corners. Heat can be applied where necessary to accommodate those difficult profiles.

The permanent air free adhesive combines the ease of a bubble free application, with a strong adhesive bond ensuring longevity to your wrap, advising the use of a primer/adhesive promoter to all surfaces especially edges and joints.

## Consistency

All films are produced consistently with the same production method, guaranteeing highest quality and outstanding performance across the range.

## Fire Safety

Interior film is fire rated to the highest EU standard achievable by a PVC film (EN13501-1). Also certified for bus & coach, and rail of which certification available from our website.

Combustibility: B

Smoke: S1

Droplets: d0

## CE

The full range carries the **CE** kite mark (to be switched to **UKCA** accreditation by the December 2024 deadline).

## IMO

**IMO** (International Maritime Organisation) both Module B and Module D certification is valid and required for the wheel of approval on all designs with the exception of MS metals and SF fabric.

## PAS 2060:2014

The internationally recognised specification for carbon neutrality published by BSI, **PAS 2060:2014** sets out the requirements for quantifying, reducing and offsetting greenhouse gas (GHG) emissions for organisations and products.
