

## CASE STUDY - PROJECT: Bannatyne Health Clubs

**SPACE**  
Architectural Interiors

Bannatyne Health Clubs, founded by Dragons' Den favourite Duncan Bannatyne, is the largest independent chain of health clubs in the UK.

▲ As part of their social responsibility programme, the company looked at ways at how they could refurbish lockers, counter tops, bars, washroom walls and doors instead of simply scrapping them and sending to landfill.

**LX BENIF Interior Film** provided the perfect solution.

Manufactured by **LX Hausys**, **BENIF Interior Films** are self-adhesive architectural films that can be quickly and easily applied to almost any interior surface.

For this project, specialist contractors **T6** used a range of **LX BENIF Interior Film** designs and finishes to cover the surfaces which even included ceramic tiled walls.

The refurbishment, part of an ongoing roll out across the clubs, was achieved without any major operational disruption to the business, and the results were both visually pleasing, cost effective and practical thanks to **LX BENIF** films low maintenance requirements and longevity of performance.

With over 470 **LX BENIF** designs and finishes to choose from, walls, doors, paneling, skirting and architrave can be quickly refurbished without the need for costly replacements.

**LX BENIF Interior Film** is CE and IMO Certified so can be specified with confidence for a wide range of applications.

▲ Specialist contractor T6 used a range of LX BENIF designs & finishes.
