CASE STUDY - PROJECT:

Easthampstead Park Hotel

Easthampstead Park Hotel, owned by Active Hospitality, is an impressive Victorian mansion set in 60 acres of parkland near Wokingham, Berkshire.

With 29 bedrooms, 17 conference rooms, an orangery, restaurant and bars, the hotel can offer companies and individuals a wide range of services and facilities.

▲ **LX BENIF Interior Film** from surface material distributors **spAce Architectural Interiors** was recently used to refurbish the hotel's reception desks, servery units and a coffee station by specialist contractors ***WRAPT***.

The hotel's Group Interior Designer takes up the story: "***I contacted WRAPT about our reception desks that needed an uplift before our main refurbishment started.***

Following their site visit, WRAPT's quote was very favourable as against replacing all the desks and other reception furniture!

In only three weeks following the initial contact, we had a finished, refurbished reception desk!

WRAPT completed the works in just a few days, while we were open, so it caused very little disruption to the business, which was great.

We were so pleased with the results we asked the company to refurbish our servery units and coffee stations which they did in only two days - while we had conferences taking place!

The finish of the BENIF Interior Film looks good and is very hardwearing so it's well worth looking to refurbish your furniture rather than replace it."

The reception desks were 'wrapped' with **LX BENIF's** Travertine and Teak finish interior film, the coffee station with **LX BENIF** Travertine and the servery units with an **LX BENIF** Marble Eeffect interior film.

LX BENIF Interior Films are self-adhesive, architectural interior films that can be quickly and easily applied to almost any interior surface.

SPACE
Architectural Interiors

With over 470 **LX BENIF** designs and finishes to choose from, desks, doors, paneling, skirting and architrave can be quickly transformed without the need for costly replacement furniture.

LX BENIF Interior Film is CE and IMO Certified so can be specified with confidence for a wide range of applications.
