

CASE STUDY - PROJECT: **Get Living London**

The use of **LX BENIF Interior Film** on projects like this kitchen refurbishment demonstrates its unique versatility and illustrates why **spAce Architectural Interiors** are seeing an increasing demand from specialist contractors, shop fitters and interior designers who are looking for cost effective solutions and innovative finishes for their refurbishment projects.

LX BENIF Interior Film proves to be a winner at Olympic Village.

Get Living London manages thousands of residential apartments at the former athletes Olympic Village at Stratford, East London – now converted to a range of modern apartments.

When tenants move out, each apartment is given a thorough inspection and clean before new tenants can move in. Time is of the essence as these apartments are extremely popular.

▲ Specialist Contractor **T6** were called in by **Get Living London** to provide an economical solution to refurbish a kitchen in one of the apartments which had become in need of a makeover.

T6 recommended using **LX BENIF Interior Film**, an architectural self-adhesive film manufactured by **LX Hausys** to 'wrap' around the existing surfaces rather than simply replace the kitchen units.

T6 were able to match the kitchen's Teak finish to a similar one in the **LX BENIF Interior Film** range. The whole installation included 'wrapping' the base unit doors, drawers, breakfast bar and skirting.

Sophie Verhoven from Get Living London said *"We had only one day to refurbish this kitchen and T6 delivered on this very tight schedule so the new tenants could move in the following day."*

LX BENIF Interior Film can be applied to almost any interior surface including: wood, metals, plasterboard, plastics and even melamine.

Easy to clean and maintain, **LX BENIF Interior Film** is hardwearing and remains stable if exposed to heat, humidity or low temperatures. It has also passed robust bleach tests when used in hospital applications.

Available in a wide range of designs and finishes, **LX BENIF Interior Film** is CE and IMO Certified so can be specified with confidence for a wide range of applications.

- ▲ An economical solution was required to refurbish the kitchen.

- ▲ T6 only had one day to complete the project.

- ▲ Interior Film was used to 'wrap' around the existing units.
