

CASE STUDY - PROJECT: HMRC Offices, Watford

HMRC offices in Watford which are leased to them by Mapeley Estates Group, recently underwent a refurbishment project, part of which involved updating a number of washrooms.

▲ A taxing problem solved with LX BENIF Interior Film.

Rather than replacing all the bench units housing the handwash basins, specialist contractors **T6** recommended to **Mapeley** that the units be refurbished using **LX BENIF Interior Film**.

This would not only save considerable replacement costs but also greatly reduce installation time as the plumbing and fittings would not have to be removed or replaced.

Interior Film, manufactured by **LX Hausys** is a versatile architectural film that is quick and easy to install and can be applied to almost an interior surface.

For this project, the **T6** team used White **LX BENIF Interior Film** and transformed four washroom units in just one day. The results were outstanding and gave a fresh, bright new look to the washrooms.

The flexibility of **LX BENIF Interior Film** ensured that even the rounded edges of the units did not present a problem, creating a seamless smooth finish.

Easy to clean and maintain, Interior Film is hardwearing and remains stable if exposed to heat, humidity or low temperatures. It has also passed robust bleach tests when used in hospital applications.

Available in a wide range of designs and finishes, **LX BENIF Interior Film** has a CE and IMO classification so can be specified with confidence.

The use of Interior Film on projects like the washrooms at HMRC offices demonstrates its versatility for use in a wide range of applications and illustrates why **spAce Architectural Interiors** are seeing an increasing demand from specialist contractors, shop fitters and interior designers who are looking for cost effective solutions and innovative finishes for their refurbishment projects.

- ▲ Rather than replacing the bench units they were refurbished using LX BENIF Interior Film.
- ▲ T6 used LX BENIF White interior film to transform the washrooms in only one day.
- ▲ Installation time was greatly reduced as plumbing did not have to be removed.
